

# PISTACHIO FOLIAR PROGRAM

## POWER2GRO™ Crop Production System

An integrated, system-based approach to maximize nut yield and quality, and improve tree and soil health.

## Foliar Program Key Benefits

- Advanced Macronutrient package ensures optimum levels for expanding fruit buds in the spring.
- Ideal ratios of Micronutrients.
- Proprietary blend of fermentation extracts, amino acids, plant extracts and surfactants designed to enhance vegetative growth and reproductive potential.

Optimizes tree growth pattern. Balances nutrients between vegetative and reproductive growth.

Improves water and nutrient use efficiency.

Larger kernel size and premium potential. Increases yield through increased crop retention.

California Ag Solutions will work with you on a customized soil and crop nutrition plan where your yield goals and budget lead to improved ROI.

# WE ARE AGRONOMISTS IMPROVING SOIL AND PROFITS.

Integrity is the cornerstone to how we do business; it's not just an empty promise.  
We're committed to earning your confidence and trust every day.

## OUR MISSION

Providing leadership and support to bridge discovery research to grower results.

## TOTAL SYSTEMS PROGRAM

We understand all systems on your farm must work together in order to be successful.

We can help you to:

- Build synergy across your entire operation
- Work from the soil up to set the foundation for healthier plants
- Support the growth of a superior crop
- Challenge traditional ideas to get the most out of your land and crops

## OUR PROCESS

We design soil improvement plans which incorporate:

- Soil amendments
- Cover crops
- PCA services
- Irrigation management
- Targeted nutrient applications

## IMPROVED SOIL EQUALS IMPROVED RETURN ON INVESTMENT

With our soil improvement plans, you can expect superior service throughout the growing season.

- Equipment setup and calibration
- Soil, tissue, and water testing
- Routine field scouting throughout the whole growing season
- End-of-season evaluation and next season planning

## OUR JOURNEY

California Ag Solutions began working with growers to adopt minimum tillage techniques with cotton. Since then, our team has expanded upon our portfolio of programs.

Some of our notable developments:

- Cover crop system irrigation
- Production practices for strip-till tomatoes, dairy forages, silage corn, winter forage, blueberries, sweet potatoes, fruit trees, citrus trees and tree nut orchards
- Customized crop foliar programs
